

Water Services Application Requirements

All plumbers/drainlayers completing drainage related activity within the Southland District will be required to complete and provide the following information:

- A completed A3 as-built form for 'ANY' drainage related activity.
- Confirmation the work has been completed or supervised by a certifying plumber/drainlayer - registration number and name to be recorded on as-built.
- A completed 'Application for Access to Council Assets and Infrastructure' form.

Please note a **minimum of five working days** is required prior to commencing any work to ensure a timely inspection of your connection. Failure to do this may result in the digging up of the connection by Council's contractor, so an inspection of the works undertaken can be viewed - all associated costs will be carried out at the owner's expense.

Should you have any questions or would like further clarification please contact Water and Waste Services on 0800 732 732.
